

Hello, I have my XM Radio for about 1 1/2 years and it is the best thing sense the wheel. I am a trucker and I drive all over the Country, I need a radio with a clear signal, XM radio gives you that. The instant traffic and weather report are the most important channel for a truck driver, it saves time and I know which route to take driving thru a city. People don't realize that a regular radio signal is only good for about 60 miles, but with XM Radio you can listen to the same channel from coast to coast and for me that is important. Please oppose bill HR4026

Thank you Rupert Haiden
